

PROPANE-FUELED EQUIPMENT FOR AGRICULTURE OPERATIONS

FOCUS ON ENERGY® makes saving energy and money easy for Wisconsin businesses. Use the information below to help you identify savings. For electronic copies, visit focusonenergy.com/propane.

The U.S. Department of Energy provides funding to the Public Service Commission of Wisconsin to support propane rebates and incentives. These rebates and incentives are delivered by Focus on Energy through its statewide network of Energy Advisors. To receive pre-approval, visit focusonenergy.com/ea-map to connect with your Energy Advisor.

Rebate Requirements

- Complete an application found in the [Agribusiness Rebate Catalog](#) (follow all requirements and submittal guidance).
 - Any measures saving propane fuel are eligible, even if the electric utility does not participate.
 - New propane-powered equipment, replacing grid-based electricity or natural gas-powered equipment, does not qualify.
- Note your Propane supplier and account number in [Section 2 – Job Site Information](#) on the application.
- Must have qualified products installed by June 30, 2026.

NOTE: Pre-approval is recommended. Funds are limited and not guaranteed.

2026 Rebate Rates

Equipment	Rebate
Boilers & Heaters	\$2.75-\$8/MBh
Furnaces	\$150-\$420/furnace depending on efficiency
Water Heaters	\$1,000/unit
Refrigeration Heat Recovery Units	\$1,250/unit
Grain Dryers	\$8-\$20/Bushel/hr drying capacity

2026 Custom Incentive Rates

Energy Efficiency	Renewable Energy
\$0.02-\$0.08 per kWh saved	\$0.10 per kWh saved or generated
\$125 per peak kW reduced*	\$125 per peak kW reduced or generated*
\$0.20-\$1.25 per Therm saved	\$1.25 per Therm saved or generated

**Peak kW reduction is determined by the average kW load reduction occurring between 2 p.m. and 6 p.m. on weekdays during June, July, August, and September.*

Custom Incentive Requirements

Custom incentives are available for energy-efficient or renewable upgrades not listed in the catalogs. These incentives include non-standard technologies or projects, excluding 1-for-1 replacements.

Examples include:

- Greenhouse climate controls.
- Insulation and thermal curtains.
- Heat recovery.
- Biomass for space heating or grain drying.

Pre-approval is required before ordering equipment, issuing purchase orders, or hiring labor for all **CUSTOM** incentives.

Custom incentives are based on the estimated energy savings from the first year of the upgrade. The calculated savings are multiplied by the custom incentive rates shown in the table above.

Custom and standard propane projects (and any connected actions) must not disturb the ground or require tree removal or trimming.

REDUCING ENERGY WASTE ACROSS WISCONSIN

Focus on Energy, Wisconsin utilities' statewide program for energy efficiency and renewable energy, helps eligible residents and businesses save energy and money while protecting the environment. Focus on Energy information, resources, and financial incentives help to implement energy efficiency and renewable energy projects that otherwise would not be completed.
