

FOCUS ON PROPANE-FUELED EQUIPMENT FOR AGRICULTURE OPERATIONS

FOCUS ON ENERGY® makes saving energy and money easy for Wisconsin businesses. Use the information below to help guide your way to savings. For electronic copies of the forms visit focusonenergy.com/propane.

Funding for incentives related to energy-efficient propane equipment has been made possible through a federal US Department of Energy State Energy Program grant to the Public Service Commission of Wisconsin, Office of Energy Innovation. These incentives are being delivered in partnership with Focus on Energy through its statewide network of Energy Advisors. Find your Energy Advisor at focusonenergy.com/ea-map to receive pre-approval.

Prescriptive Incentive Requirements

- Complete an application found in the Agribusiness Incentive Catalog (follow all requirements and submittal guidance).
- Confirm your electric utility participates in Focus on Energy at focusonenergy.com/utilities.
- New propane powered equipment displacing grid based electricity or natural gas powered equipment does not qualify.
- Note your Propane supplier and account number in **Section 2 – Job Site Information** on the application.
- Qualified products must be installed by June 30, 2024.
NOTE: Pre-approval for prescriptive incentives is recommended as funds are limited and not guaranteed.

Custom Incentive Requirements

Custom incentives are for energy efficient and renewable energy upgrades not found in the Focus on Energy Incentive Catalogs. These incentives are for non-standard technologies or for projects which do not include a 1-for-1 replacement.

Examples include:

- Greenhouse climate controls.
- Insulation and thermal curtains.
- Heat recovery.
- Biomass for space heating or grain drying.

Pre-approval is required prior to ordering equipment, issuing purchase orders or contracting labor for all **CUSTOM** incentives. Custom incentives are based on estimated first year energy savings achieved from an energy efficiency or renewable energy upgrade. The calculated savings are multiplied by the custom incentive rates found in the table above.

REDUCING ENERGY WASTE ACROSS WISCONSIN

Focus on Energy, Wisconsin utilities' statewide program for energy efficiency and renewable energy, helps eligible residents and businesses save energy and money while protecting the environment. Focus on Energy information, resources, and financial incentives help to implement energy efficiency and renewable energy projects that otherwise would not be completed.

©2024 Wisconsin Focus on Energy

2024 Prescriptive Incentives

Equipment	Incentive
Boilers & Heaters	\$1.00-\$5.00/MBh
Furnaces	\$100.00-\$270.00 per furnace depending on efficiency
Water Heaters	\$500.00
Refrigeration Heat Recovery Units	\$750.00/unit
Grain Dryers	\$16.00/Bushel/hr drying capacity

2024 Custom Incentive Rates

Energy Efficiency	Renewable Energy
\$0.05 per kWh saved	\$0.10 per kWh saved or generated
\$100.00 per peak kW* reduced	\$100.00 per peak kW* reduced or generated
\$1.00 per gallon propane saved	\$1.25 per therm saved or generated

*Peak kW reduction is determined by the average kW load reduction occurring between 2 p.m. and 6 p.m. on weekdays during June, July, August, and September.
