

TUNE UP YOUR GRAIN DRYER WITH FOCUS ON ENERGY®

Grain dryer tune-ups can improve operational efficiencies and lower energy use during the drying process. Tune up your dryer equipment with the help of Focus on Energy and see a return on your investment less than halfway through the season.

A grain dryer tune-up includes the following:

- Clean fans and lubricate bearings associated with ventilation systems.
- Clean screens (drying floor and columns).
- Clean burner, check pressure regulator, and inlet air adjustment.
- Clean and calibrate temperature sensors.
- Clean and calibrate moisture sensors.
- Optimize control settings including plenum temperature setpoints.

Financial Incentive

Work directly with a participating Grain Dryer Tune-up Trade Ally and receive \$100 off your tune-up cost. Offer limited to corn dryers only, one tune-up per dryer per calendar year.

Get Started

Contact a participating Grain Dryer Tune-up Trade Ally to schedule a tune-up session today.

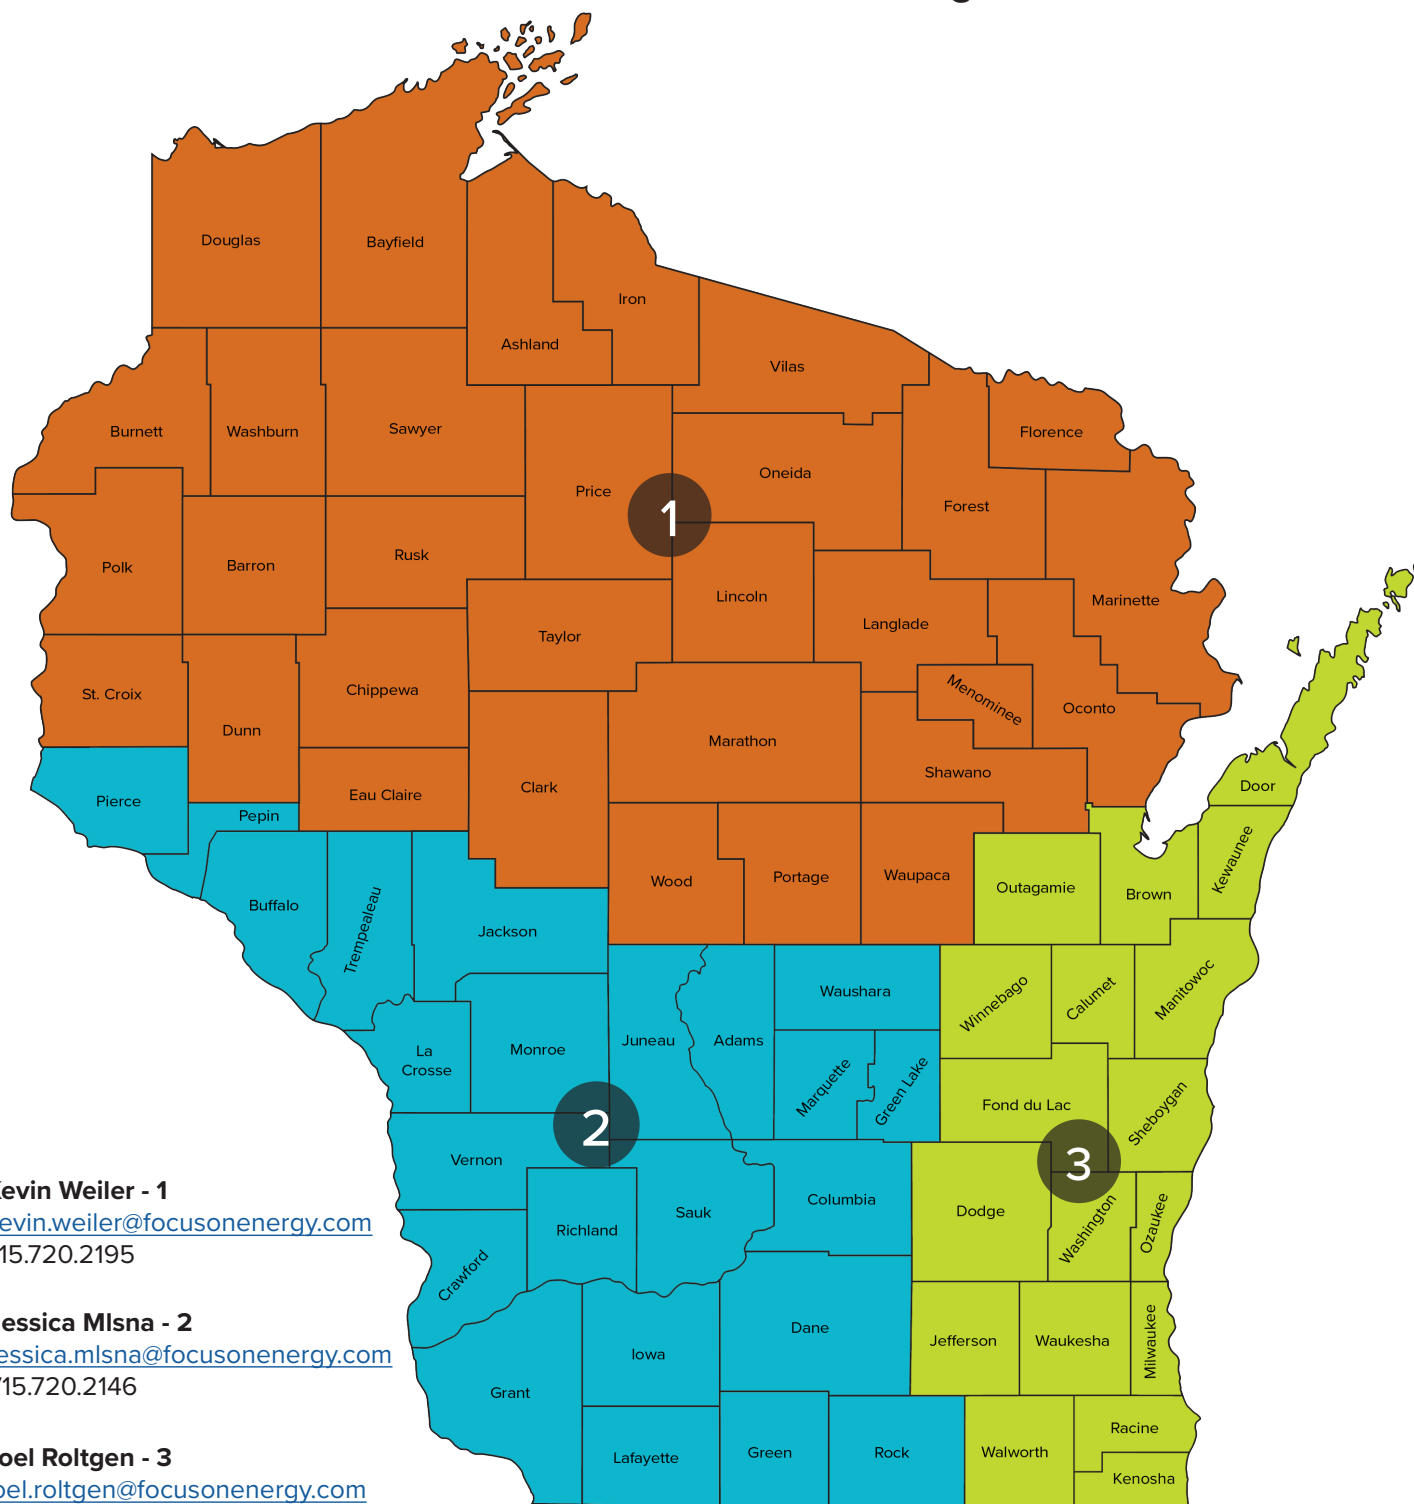

Find a list of participating Trade Allies at focusonenergy.com/findatradeally.

For additional questions, contact your local Energy Advisor (see reverse side).

REDUCING ENERGY WASTE ACROSS WISCONSIN

Focus on Energy, Wisconsin utilities' statewide program for energy efficiency and renewable energy, helps eligible residents and businesses save energy and money while protecting the environment. Focus on Energy information, resources, and financial incentives help to implement energy efficiency and renewable energy projects that otherwise would not be completed.
